Snow Skate and Snow Bike Prohibition Policy

The purpose of this policy is to ensure safe operations and reduce equipment-related incidents.

PROHIBITED EQUIPMENT NOTICE

Snow skates, ski bikes, snow bikes, snow scooters, sleds, tubes, toboggans, and other unauthorized sliding devices are not permitted on resort lifts, trails, or terrain parks. Guests using prohibited equipment may have lift privileges revoked without refund.

The Resort has determined that snow skates and snow bikes present unique operational and safety concerns, including but not limited to:

Guest Safety

- Reduced control and maneuverability in congested skiing areas.
- Increased potential for collisions with skiers and snowboarders.
- Difficulty maintaining safe stopping distances.

Exceptions

Exceptions may only be granted by the General Manager or their designee for:

- Approved adaptive sports programs.
- Authorized demonstrations.
- Manufacturer testing events.
- Organized special events approved in writing by Resort Management.

All approved exceptions must undergo a formal safety and operational review prior to authorization.

Resort Management reserves the right to determine which equipment is permissible for use on resort property and may modify this policy at any time when deemed necessary for safety or operational reasons.
